

Game 5

Player A wins if the outcome on both spinners is the same (yellow/yellow or green/green), Player B wins if they are different (yellow/green or green/yellow).

Spin both spinners 36 times, recording who wins each time.

- How many times did each player win?
- Were you surprised at your results? Why (not)?
- What would you expect to happen if you played for a very long time?
- Is this a fair game? Why (not)?
